why is webGL not working!?

i've been using scratch for a long time on windows 10 and all of a sudden it just says my browser doesn't support WebGL. I can't view or make any projects. I'm confused as to why this is happening. Are there any suggestions other than to update the graphics driver?

I'm not a Google employee, and the forum is not tech support!

Hello of 5251, Welcome to the Google Chrome user support forum!

click to check WebGL <https://get.webgl.org/>

Thanks for the question. Everything stated above is my personal opinion and does not necessarily guarantee a solution. If the answer helped you, click the [Recommend] button.

I'm not a Google employee, and the forum is not tech support!

Hello of 5251, Welcome to the Google Chrome user support forum!

Many thanks for your message. And welcome to the Google Chrome Help Community.

Please try this things:

- Upgrade your Graphics Card Driver, if possible. In most cases, Chrome cannot enable WebGL because the Card/Card Driver ist not capable.
- Enter this into the Address Bar and check if there are any conflicts: **chrome:gpu**
- Enable the *Override Software Rendering List* Flag in **chrome:flags**

Please let me know if this helps.

Thanks for the question. Everything stated above is my personal opinion and does not necessarily guarantee a solution. If the answer helped you, click the [Recommend] button.
